## Description

Collected in 140 l or 240 l receptacles and emptied by specially designed vehicles. The customer is responsible for keeping the receptacle clean.

## Collection

Collected from large-scale households, grocery stores, food industry, cafeterias, etc.

## Processing

Visually quality controlled.

## Recycling

Food waste is converted into raw material for biogas plants or recycled for energy. The residual product is used for soil improvement after heat treatment.

## Non-compliance

A sorting fee may be charged if the item is not sorted into a homogeneous fraction. If sorting is not possible, the entire delivery can be reclassified.
